# MOBILITY OPTIMIZATION AND MANAGEMENT CHANGED FOREVER

vMOX is a fully managed optimization service that reduces costs, unproductive time and headaches for enterprises that maintain a corporate liable mobility environment. We own and are continually developing a proprietary optimization and management platform that separates us from the competition. With our managed service model, we handle all the tasks and technology and you make all the decisions. Our technology, investment in R&D and human resource development is focused on driving industry and management tools.

- **Reduce mobility spend, typically by 20%-40%**
- **Provide detailed reporting and analytics**
- **Proactively handle all carrier interactions**
- **Manage device procurement and inventory**

All achieved with no service disruptions, no provider changes and minimal client time and effort required.

OUR METHODOLOGY

Our proprietary optimization methodology stands alone in the marketplace, leveraging sophisticated algorithms, leading mobile cost containment techniques and our aggregate rate plan database to optimize your environment on an on-going, monthly basis. Modifications are submitted to the carriers electronically and audited for accuracy down to the penny. Every change is tracked and if not processed properly, we automatically seek bill credits and request the change be completed correctly. We proactively deliver reports that provide visibility into every detail of your bills, that automate cost allocations and that manage inventory data, general ledger coding and more.

OUR TECHNOLOGY

Our single-source Mobility Portal provides real-time access to the complete lifecycle management of your mobile environment. View wireless expense data, complete with charts and graphics; analyze spend by carrier, department, group or individual user; access your complete device inventory and determine upgrade eligibility or early termination fees for all devices. The portal's comprehensive service management and ticketing system handles all service and support requests, and it's procurement functionality lets you offer self-service device ordering to your employees.

OUR RATE STRUCTURE

Our performance-based pricing model guarantees a 100% ROI and ensures everyone's interests are aligned. We simply charge a percent of what we are able to save you.

100% RETURN ON INVESTMENT
"If we don't perform, you don't pay."
